

**IN THE ABSTRACT OF THE DISCLOSURE**

Page 58, lines 3-9, delete in their entirety and substitute therefore the following new  
Abstract of the Disclosure on the next page 11 of this paper.

## ABSTRACT OF THE DISCLOSURE

A probe is disclosed, which includes a beam, which has a leading end, an intermediate portion and a base end. The leading end is a portion for contacting a test subject through a contactor, and the base end is a portion for fixing the probe. The probe includes a substantially trapezoidal contactor, which is fixed to the leading end of the beam.
